EXPERIENCE

SuperHappyDevHouse
Nov 2005 - Present

I help organize a well-known programming party that is modeled after the Homebrew Computer Club.

Microsoft
Nov 2009 - Mar 2012

Represented Microsoft to startups in the Silicon Valley. Helped peers, management, and senior executives to better understand the culture and community of the Silicon Valley. Built relationships with key partners, assisted in the development of Microsoft's US startup evangelism strategy, got Microsoft's logo on the front page of GitHub, and reestablished an important relationship with an influential seed-stage startup funding firm.

NetBooks, Inc.
Jan 2009 - Aug 2009

Assisted in the management of servers running the "Working Point" Ruby on Rails application. Set up centralized logging, internal SSL CA, created backup strategy, managed safe handling and destruction of sensitive customer data.

PBwiki, Inc.
Nov 2007 - Jan 2009

Implemented OpenID login for PBwiki using JanRain's PHP OpenID library. Improved existing Perl deploy scripts to reduce apparent code rollout time from over 10 minutes to under 1 second. Migrated PBwiki code and servers from PHP4 to PHP5.

Cuesta College
Nov 2003 - Nov 2007

Managed roughly 80 Mac OS X computers, including 3 classroom labs. Installed and maintained layer 2/3 network equipment. Proposed, installed, and promoted the use of MediaWiki - which eventually became the primary source of documentation for the department.

Terracom S.A.R.L.
Jun 2004 - Sep 2004

Trained staff. Configured a proxy server to reduce response of frequently visited websites by a factor of 100.
