EXPERIENCE

Okta
May 2014 - Present

Help customers overcome difficult technical challenges by providing guidance, support, sample code, and documentation. Wrote sample code to demonstrate adding SAML support to Python, PHP, and Java/Spring. Helped launch Okta's SCIM Beta by writing a sample SCIM server, accompanying documentation, and launching Okta's SCIM workshops. Wrote OpenVPN plugin to add Okta MFA support to OpenVPN. Provide guidance and support to prospective and existing customers (over 100 to date). Technical lead for the relaunch of developer.okta.com

SuperHappyDevHouse
Nov 2005 - Oct 2013

I helped organize a well-known programming party that is modeled after the Homebrew Computer Club.

Twilio
Apr 2012 - May 2014

Promoted awareness and adoption of Twilios tools by attending over 90 developer focused events, delivering presentations at a third of those events, and writing blog posts which are responsible for over 37k+ pageviews to Twilios blog. Presented Twilio to Stanfords CME/CS184 class and MOOC.

Microsoft
Nov 2009 - Mar 2012

Represented Microsoft to startups in the Silicon Valley. Helped peers, management, and senior executives to better understand the culture and community of the Silicon Valley. Built relationships with key partners, assisted in the development of Microsoft's US startup evangelism strategy, got Microsoft's logo on the front page of GitHub, and reestablished an important relationship with an influential seed-stage startup funding firm.

NetBooks, Inc.
Jan 2009 - Aug 2009

Assisted in the management of servers running the "Working Point" Ruby on Rails application. Set up centralized logging, internal SSL CA, created backup strategy, managed safe handling and destruction of sensitive customer data.

PBwiki, Inc.
Nov 2007 - Jan 2009

Implemented OpenID login for PBwiki using JanRain's PHP OpenID library. Improved existing Perl deploy scripts to reduce apparent code rollout time from over 10 minutes to under 1 second. Migrated PBwiki code and servers from PHP4 to PHP5.
